-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election of Group I in the reply filed on 11/3/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 28 and 30 are rejected under 35 U.S.C. 102(a) as being anticipated by US 2002/0161468 (Liu). Liu teaches generating a continuous beam of radiation having a wavelength capable of heating the region (abstract); and b. scanning the radiation over the one or more regions in a scan direction so that each point in the one or more regions receives an amount of thermal energy capable of processing each of the one or more regions (abstract and paragraph 144); wherein the one or more regions include integrated circuits (paragraph 2) and the radiation of step b. forms an image having a dimension perpendicular to the scan direction of 1 cm or less (paragraph 6).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 29 is rejected under 35 U.S.C. 103(a) as being unpatentable over US 2002/0161468 (Liu) as applied to claim 28 above and further in view of US 4,370,175 (Levatter). Liu teaches the image has a dwell-time over each point in the one or more regions of between a microsecond and a millisecond (paragraph 6). Liu also teaches the use of a wafer, but not monocrystalline wafer. Levatter teaches laser annealing a monocrystalline wafer (col. 1, ll. 64-66). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the wafer of Liu to utilize a monocrystalline wafer in order to provide a solder voltaic cell (see Levatter col. 1, ll. 5-65).

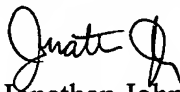

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonathan Johnson whose telephone number is 571-272-1177. The examiner can normally be reached on M-Th 7:30 AM-5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Dunn can be reached on 571-272-1171. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
